25. Short Location or Area Description (list all affected areas or a reference point): Santa Anna River Drainage, Snow Summit Ski Resort, Big Bear City			26. UTM Coordinates: Zone: Easting: Northing:								
27. Note any geospatial data available (indicate data format, content, and collection time information and labels): https://ftp.wildfire.gov/public/incident_specific_data/calif_s/!2022_Incidents/CA-BDF-012958_Radford/											
28. Observed Fire Behavior or Significant Events for the Time Period Reported (describe fire behavior using accepted terminology. For non-fire incidents, describe significant events related to the materials or other causal agents): Minimal											

Incident Status Summary (ICS-209)

Incident: **RADFORD**

Creeping Smoldering
 Narrative:
Minimal fire activity on all areas of the fire overnight. Expecting similar conditions tomorrow.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

**Timber (Litter and Understory)
 Chaparral (6 feet)
 Brush (2 feet)**

Narrative:
Fuels in the area are Timber and mixed brush with no significant fire history. There is significant heavy ground fuels due to lack of fire history and beetle kill from the early 2000s. Most fuel indices are considered at average levels for this time of year but those indices are slowly climbing due to the persistent high pressure system producing record heat in the area.

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc): At this time there is no threats of fire impacting structures. There does still remain a threat of flooding from forecasted thunderstorms.	A. Structural Summary	B. # Threatened (up to 72 hrs)	C. # Damaged	D. # Destroyed
	E. Single Residences	0	0	0
	F. Multiple Residences	0	0	0
	G. Mixed Commercial / Residential	0	0	0
	H. Nonresidential Commercial Property	0	0	0
	I. Other Minor Structures	0	0	0

Incident Status Summary (ICS-209)

Incident: **RADFORD**

causing additional risks for driving, falling trees, rock and debris flows.		Active?
<p>35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern): Lingering tropical moisture will continue the threat of showers and thunderstorms today before a gradual drying trend starts on Monday. Less cloud cover today will allow increased instability and a better chance for thunderstorm development this afternoon along with slightly warmer temperatures. Expect lower daytime RH minimums as the atmosphere dries and there is less cloud cover. Temperatures will trend downward toward seasonal norms after Sunday. Remnants of TS Kay will move eastward Tuesday.</p>	A. No Likely Threat	X

	M. Quarantine in Progress	
	N. Area Restriction in Effect	X
O. Road Closure	X	
P. Trail Closure	X	
Q. Area Closure	X	

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:	
12 hours:	Fire activity will continue to be minimal and limited to smoldering and creeping. Rain remains in the forecast.
24 hours:	intermittent Wet weather will continue to limit fire spread, activity and escalation. limited pockets of heavy fuels will continue to burn out within the interior of the fire.
48 hours:	Fire activity is expected to be minimal due to cooler temperatures and cloud cover. No additional fire growth in all divisions.
72 hours:	Weather should help to limit any spread or incident escalation.
Anticipated after 72 hours:	After the weekend the weather will remain cooler with unsettled conditions and the potential of additional rain. Towards midweek expecting a drying pattern.

37. Strategic Objectives (define planned end-state for incident):	
Keep the fire north of State Route 38 to prevent the fire from spreading into the San Gorgonio Wilderness and recreation facilities.	
Keep the fire south of San Bernardino National Forest Boundary to protect Big Bear Lake and Big Bear City.	
Keep the fire east of Clarks Grade to protect the Bear Creek watershed and Snow Valley ski resort.	
Keep the fire west of Forest System Road 2N93 and State Route 38 to protect the Santa Ana River watershed and the communities of Erwin Ranch, Lake Williams, Burns Canyon, and Rim Rock.	
Safety for firefighters and the public through hazard recognition and application of the risk management process. Protect property, both public and private, including the following areas: Communities of Big Bear, Big Bear Lake, Baldwin Lake, Moonridge, Sugarloaf, and Boulder Bay. California Spotted Owl PACs, cultural resources, Wilderness Areas, Class 1 airsheds and heritage resources. Mitigate the spread of Covid-19 using best practices precautions. Integrate with cooperating agencies. This is a full suppression incident and the incident will use roads, ridges, and fuels treatment areas as holding opportunities to keep the fires as small as possible.	

Incident Status Summary (ICS-209)

Incident: **RADFORD**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts: 12 hours: Minimal threats during this time period. 24 hours: Not expecting any additional threats. 48 hours: Further reduction of risks to known values and identified infrastructure. 72 hours: No expectation of any threats. Anticipated after 72 hours:
39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order: 12 hours: 24 hours: 48 hours: 72 hours: Anticipated after 72 hours:
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results. Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts. Overall strategy will be to continue with direct line where possible and continue to limit the overall fire footprint. Steep rugged terrain. Local technical specialists will assess cultural resource sites if possible, prior to engagement, and in the planning process to identify categories of archaeological sites, and recommend appropriate level of protection. Fire managers will consult with archaeological resources advisors assigned to the incident to minimize direct and indirect impacts. Numerous threatened and endangered plants as well as designated Critical Habitat occur from Bear Mountain east to Sugarloaf Mountain. Additional areas of Critical Habitat occur in meadow habitat west of the fire. Protect property, improvements, and infrastructure on the private lands adjacent to the forest. Incident overhead will strive to develop and maintain relationships with the cooperators and stakeholders while working toward the continued improvement of those relationships. The Sugarloaf Inventoried Roadless Area is east of the fire at Staircase Canyon continuing east along the ridge of Bear Mountain and Sugarloaf Mountain. Creation of dozer lines is not authorized within the IRA without appropriate approvals.
41. Planned Actions for Next Operational Period: Incident will continue to demobilize excess resources in support of other incidents. Crews will continue to build direct line and mop up other areas of the fire.
42. Projected Final Incident Size/Area (use unit label – e.g., "Acres", "Square Miles"): 1,088
43. Anticipated Incident Containment or Completion Date: 09/30/2022
44. Projected Significant Resource Demobilization Start Date: 09/10/2022
45. Estimated Incident Costs to Date: \$6,200,000.00
46. Projected Final Incident Cost Estimate: \$10,000,000.00
47. Remarks (or continuation of any blocks above – list block number in notation): Incident is in Unified Command with San Bernardino County fire, San Bernardino National Forest and Big Bear Fire Department.
